

Triumfant Achieves Technology Partner Status in the McAfee Security Innovation Alliance

Triumfant Resolution Manager Provides Customers with Easily Integrated Desktop Configuration, Compliance and Security Capabilities

Rockville, MD – October 5, 2009 -- [Triumfant](#)®, creator of patented software that automatically discovers, analyzes and remediates unexpected changes and conditions at the endpoint, today announced that Triumfant's Resolution Manager has been awarded the "McAfee Compatible" designation, and as such is promoted to Technology Partner, in the McAfee® Security Innovation Alliance™ (SIA) partner program. Triumfant's Resolution Manager uses Triumfant's patented analytics to identify and remediate unexpected changes and conditions in the desktop environment. Triumfant is also now a McAfee Sales Teaming Partner and the Resolution Manager integration with McAfee ePolicy® Orchestrator (ePO™) will help drive more complete security solutions to large organizations.

"A key goal behind the McAfee Security Innovation Alliance is to accelerate the development of interoperable security products and simplify the integration of those products with complex customer environments," said Ed Barry, senior director of the Security Innovation Alliance, McAfee. "We're thrilled to see Triumfant leverage McAfee's investment in its security risk management platform and bring new value to our mutual customers."

Triumfant leverages a one-of-a-kind ability to discover, diagnose and repair unwanted changes and unexpected conditions on endpoint computers and servers to detect previously unidentified malicious attacks, perform security configuration management, and enforce organizational and mandated security policies. Triumfant Resolution Manager sends periodic summary reports on the anomalies it detects to ePO dashboards, which helps ensure that every computer starts the day secure and compliant.

The SIA partner program allows McAfee customers to leverage their investments while adding complementary capabilities beyond McAfee's core offerings, such as those delivered by the Triumfant Resolution Manager. By implementing products with the McAfee Compatible logo, mutual customers can enjoy faster time to deployment and lower total cost of ownership.

“Since joining the McAfee Security Innovation Alliance earlier this year, we have seen increased interest from companies looking for an integrated approach to addressing their desktop security, compliance and configuration requirements,” said John Prisco, CEO of Triumphant. “The McAfee Compatible designation is further proof that enterprises can be confident that the synergies between McAfee and Triumphant can provide them with greater protection, reduced risk and increased compliance.”

McAfee ePO is the first platform that lets enterprises and governments centrally manage security and compliance products from multiple vendors, offering unprecedented cost savings and return on investment. With more than 35,000 customers and managing more than 60 million PCs and servers, this unique platform is helping McAfee SIA partners to extend their reach and create complementary functionality.
